

DIRECT SERVICES TO AFFILIATED LIBRARIES

The goal of this policy is to insure that each county participating in NEGRLS will have the opportunity to request and receive a fair share of the direct services offered.

TECHNICAL SERVICES

As the per capita allotment of materials provided to the Region by the State is distributed equitably among member libraries, the efforts of the Technical Services Librarian are, by definition, distributed fairly.

OUTREACH

The Program/Outreach Services Specialist or Librarian will provide programming, as requested and as allowed by budgetary and personnel factors, to the affiliated libraries. The outreach librarian will be available to provide programming to each affiliated library for a number of hours each month based on the population of the library's service area relative to the population of the Region as a whole.

NEGRLS will also provide outreach services to area agencies such as day-care centers and nursing homes on a request basis whenever possible within budgetary and personnel limitations.

TECHNOLOGY SERVICES

The Technology and Systems Librarian will provide direct assistance as requested to the affiliated libraries as allowed by budgetary and time factors.
